

LEICESTERSHIRE

FIRE and RESCUE SERVICE

Building **ASHRY** Name:

Building Wilfred Place, Ashby-De-La-Zouch, LE65

Address:

Will Davis Surveyor: Date of Survey: 20 October 2016 Weather: Overcast Estimated 1970s Construction Year: 197.2 (Estimated) GIA (sam)

Building Description:

Single storey fire station estimated to be constructed circa 1970's. The property is constructed from masonry with new aluminium framed double glazed window and door within the last 3 years The roof is constructed of mineral felt on a presumed timber deck, split over two levels with internal drainage.

The property frontage is open with soft landscaping to the left and parking available to both sides, although the left hand side is unmarked. There is a mixture of concrete post and mesh fencings and weldmesh fencing to either side. There is a four storey galvanised tower to the rear which has been recently erected.

Internally the building is predominantly plaster boarded and skimmed walls with plastered ceilings throughout. The appliance bay consists of painted brickwork with quarry tile/concrete flooring.

LHS/RHS references are as facing the front of the building.

The following areas were not accessible: None.

The property was surveyed by James Charles on the 16th of November 2016. The M&E services are in good condition, despite being basic.

Lights are generally controlled via PIR and are surface mounted, with circular LED downlights in corridors and batten luminaires in offices and plant spaces. Power is provided via a 100A 3phase PME connection. Fire detection is via local ceiling mounted battery powered detectors.

The building is heated via electric panel heaters, with hot water provided via local electric water heaters.

Ventilation is provided by local extract fans in toilets, with openable windows in office areas.

Compliance Documentation:

Asbestos Register Received from HQ 5 Year Electrical Test Electrical 26.03.16 Gas Flue Certificate 03.07.15 -

Lift Inspection Certificate 30.06.16

AC F Gas Test Certificate 19.07.16

Appliance Bay Extract

LV Certificate 15.12.16 N/A

Catering Equipment Gas Test Gas Boiler Test

03.07.15 Water Storage Tank and Chlorination Certificate Legionella Testing 13.07.16

Lightning Protection N/A

Received from HQ Site Drawings

Due to the small size of the site, there is very limited scope for better utilization of the existing space.

Executive Summary:

The building is considered to be in a good condition with the exception of the repointing of the external rear wall.

There are localised areas of paintwork to be touched up and minor fire stopping to be carried out. Due to the lack of use this site appears to get, the wear and tear is a lot less than normal and items appear outdated as opposed to be in poor condition.

Forward Maintenance Summary:
