The payment is further enhanced by a multiplier of 1.5.

### **Schedule**

#### **Explanation of the CFO's Terminal Adjustment Payment**

1. At its meeting on 21<sup>st</sup> September 2011 the CFA agreed to re-employ the CFO on a further 3 year fixed term contract in accordance with the Retirement and Pensions Policy with effect from 30<sup>th</sup> April 2012 on terms and conditions to be approved by the CFA at a later date.
2. At that time the CFA had an independent adviser on the pay and performance of the CFO. The adviser was tasked with drawing up options for the CFO's remuneration package for approval by the CFA. The adviser worked with the then Chairman and Group Leaders and was supported by the Treasurer, the Solicitor and Monitoring Officer and Leicestershire County Council's Pensions Section as necessary. The CFO was also consulted during the process.
3. The option chosen by the CFA on 30<sup>th</sup> November 2011, following the advice of the advisor, and agreed with the CFO was to make re-employment conditional upon the CFO drawing his Firefighters' Pension. A notional salary figure would be set from which the pension payment would be deducted with the difference being paid as salary. This would result in a saving to the CFA for the duration of the contract of more than £250,000 in lower salary costs and lower pension and national insurance payments.
4. It was recognised that this option would impact upon the CFO's pension under the Local Government Scheme (LGPS) (that he was eligible to join on his re-employment) as this is a final salary scheme and there was to be a significant reduction in his pensionable pay. To mitigate any loss to the CFO it was agreed that the CFO should be allowed to draw his LGPS pension at the end of his fixed term contract rather than having to wait a further 9 years until his 65<sup>th</sup> birthday. It was estimated that this would cost the CFA £50,000.

5. Subsequently, it was discovered that the early release of the CFO's LGPS pension would not be legally possible. As a consequence, the then Chairman and Group Leaders entered good faith negotiations with the CFO to vary the CFO's contract of employment to rectify the problem.
6. Further comprehensive pensions advice from specialist external advisers was sought and alternative approaches were identified. These were discussed with the CFO and External Audit and a proposed way forward agreed with the CFO. This was based upon paying the projected "loss" to the CFO in not receiving the early release in full (based on a life expectancy of 81 years). Assuming an investment return based on the 'risk free' return from a government bond of 3.40%, the lump sum necessary to make up for this loss would be around £50,000.
7. On 13<sup>th</sup> February 2013, the CFA agreed the payment of a terminal adjustment of £50,000 to the CFO subject to achievement of an agreed transition plan as determined by the CFA.
