LEICESTERSHIRE
FIRE and RESCUE SERVICE

IRMP 2020-2024 Supporting Information Table

What is the proposal?	What does our analysis tell us?	What is the detailed supporting information?
Response Times To use our fire engines flexibly, aiming to attend life threatening incidents in an average of 10 minutes	Our stations are well positioned to respond to incidents in our higher risk areas within 10 minutes but it can take longer to reach other areas. We also know that demand for our services is lowest in the early hours of the morning and highest in the evening.	IRMP Baseline Response Times IRMP Over the border IRMP Station Profiles IRMP Community Risk Model IRMP Site Specific Risk
Availability (expand capacity) To use our firefighters efficiently and flexibly to maximise our appliance availability	Some of our On-Call fire engines are not available to respond to incidents as often as we would like, using On-Call firefighters more flexibly can in part improve this situation.	IRMP Demand IRMP Station Profiles
High reach appliance To purchase a second high reach appliance to replace the older one of the two vehicles	In the last five years, our two high reach appliances have attended 471 incidents. A further seven incidents were attended by high reach appliances from neighbouring fire and rescue services. On 13 occasions, both high reach appliances were in use at the same time, of which, on eight occasions at the same incident and on five occasions, at different incidents.	IRMP Aerial Ladder Platform IRMP Station Profiles
Targeted work To continue to undertake education and enforcement activities, targeting those most at risk	In the past five years, we have carried out over 24,000 home fire safety checks and given advice at the doorstep to another 4,400 households. Our risk matrix prioritises those people who are more likely to be injured in a fire, due to their health, lifestyle or location. For example, about 62% of people who received a home fire safety check were aged 65 or over, where poor health is more likely to be a factor.	IRMP Station Profiles
Collaborate (better deliver existing services) To continue to collaborate with other emergency and non-emergency services	We have a number of services which are the result of collaborative ventures including: <ul style="list-style-type: none"> • Joint Fire Control • Coalville • SHQ • Over the border • Attending medical incidents 	See IRMP website

	<ul style="list-style-type: none"> • Bariatric • Gaining entry • Referrals for HFSCs 	
Empowerment (provide new services) To empower staff to deliver a wider range of activities to help the community	<p>In the past few years we have piloted a range of new activities which help to keep people safe and secure such as: running falls clinics with local falls prevention teams, attending medical incidents and working with local community organisations such as food banks. These have all benefited the local community.</p>	See IRMP website
Day crewing plus To implement an alternative to the day crewing plus shift system	<p>There are six stations that will be affected:</p> <ul style="list-style-type: none"> • Birstall • Castle Donington • Coalville • Hinckley • Oakham • Wigston <p>Supporting Information:</p> <ul style="list-style-type: none"> • IRMP Station Profiles
