## **RESPONSE**

**AIM: RESPOND EFFECTIVELY TO INCIDENTS** 

- 1) Manage calls to fires and other emergency incidents
- 2) Provide a 24/7 response to local, regional, national and international incidents
- 3) Supply the appropriate resources and attend incidents to meet the needs of our communities
- 4) Meet our communities' expectations in resolving incidents

# Chapter 3 - Health, Safety and Welfare Risks

|         | FE HAZARD CTATEMENT RATIONALE  | RIS   | K ASSESS | SMENT SC | ORES |    |  |   |
|---------|--|---|----------|----------|------|----|--|---|
| H&S REF | HAZARD STATEMENT   | RATIONALE   | L        | С        | R    | ML | CONTROL MEASURES   | Date of last Assurance at H&S Committee |
| 21/HS01 | Management of contaminants (Specific Hazard)   | The interim guidance from the UCLAN / FBU research has now been published.  | 2        | 5        | VH   | ST | <ul> <li>Review how risk information is passed on to<br/>other organisations re contaminants</li> </ul>  | January 2024                            |
|         | There is a possibility that staff could come to harm as a result of exposure to contaminants during their employment with the Service.  LFRS has a moral and legal obligation to reduce the risk posed to staff in the long, medium and short term.                    | The HSE has been asked for this to form the basis of risk control for contaminants  The scientific review identifies significant potential risks for Firefighters and other staff who attend fire scenes and identify control measures which will require planning, investment and cultural changes to implement.  The impact of the risk is very high as it is linked to fatal illness as well as other issues such as morale.  The likelihood is medium/low as the impact is likely to be experienced in the long term. |          |          |      |    | <ul> <li>Review of risk assessments in relation to working in the appliance bay, BA workshop, fire investigators. Post fire activities, working with other organisations or allowing them to enter fire scenes</li> <li>Review PPE and equipment provision particularly gloves, water bottles and bags for soiled kit</li> <li>Review washing protocols and the implications for warranties for fire hoods and helmet cradles</li> <li>Review the welfare procedure in relation to food, rest and hygiene requirements. Hydration, crew rotation and the delivery of fresh PPE to scene should also be included</li> <li>Review how exposure to contaminants can be managed for high exposure roles such as in learning and development and consider whether the service needs to introduce standards around tenure</li> <li>PPE surveys to resume</li> <li>Review deployment of crews returning to stations with bagged up kit</li> <li>Guidance produced for management of contaminants</li> <li>Policy produced and approved</li> <li>Roll out of procedures and equipment for management of occupational exposure to contaminants</li> <li>Training and education packages produced for input at several contact points for operational personnel</li> <li>Changes in LFRS Management of occupational exposure to contaminants guidance has informed changes in fleet solution, allowing for lockers for stowage of clean and contaminate PPE/clothing.</li> </ul> |   |
| 21/HS02 | Management of manual handling (Specific Hazard)  There is a possibility that staff may come to harm as a result of the failure to apply appropriate manual handling techniques.  LFRS has a morale and legal obligation to reduce the risk posed to staff in the long, | Manual handling is especially problematic within fire services as lifts have to take place in time critical scenarios when staff are already fatigued.  This puts the individual at greater risk as they are less likely to lift in a textbook manner and are more vulnerable to injury when already  | 3        | 4        | VH   | ST | <ul> <li>Training improvements.</li> <li>Lifting sheet roll out.</li> <li>Manual handling procedure.</li> <li>Liaison regarding care plans.</li> <li>Manual handling assessments to be developed further.</li> </ul>   | January 2024                            |

|         | medium and short term.   | fatigued.  In non-fire scenarios, lifts are often undertaken in poor postural positions due to the layout of domestic premises.  The impact of this risk is significant as many lifts could have the potential to injure operational staff as textbook technique cannot be applied due to the limitations detailed above plus there is a specific risk of injuring a vulnerable person such as a bariatric person or elderly, infirm or end of life patient as lifting them could be inherently hazardous.  Likelihood is medium high as these lifts are commonplace and the standard control measures in the hierarchy of control are not available to the service in most instances. |   |   |    |    | <ul> <li>Introduction of targeted fitness training trial to build core strength and reduce potential for manual handling injury.</li> <li>Support staff will receive online manual handling training and risk assessment process,</li> <li>Trained Manual handling assessors in T&amp;D, with wider roll out of training to workplace trainers.</li> <li>All Ops staff to receive Manual Handling training from workplace trainers.</li> <li>Back strengthening exercises produced by Occupational Health and Wellbeing Team</li> </ul> |              |
|---------|--|--|---|---|----|----|---|--------------|
| 21/HS03 | Health and Safety training provision (Management Risk)  There is a risk that LFRS may not meet its obligations to provide effective health and safety training for staff resulting in a potential for harm and possible breach of statutory duty.  | The service has a legal responsibility to provide effective H&S training for managers to ensure that these managers understand their responsibilities and implement the control measures relevant for the protection of our staff and others.  This lack of training may result in the service being found directly in breach of its duties or it may lead to a breach in another statutory H&S duty.  The risk's impact is significant due to the potential for statutory breach, however, likelihood should reduce.  | 2 | 5 | VH | ST | <ul> <li>Completion of roll out of management training.</li> <li>Health and safety training input delivered to new recruits.</li> <li>IOSH Supervising Safely delivered to Level 1 ICS qualified staff – currently 36% Completed course.</li> <li>Station Managers are nominated for NEBOSH General certificate.</li> </ul>   | January 2024 |
| 21/HS04 | Failure to complete suitable and sufficient Health and Safety Risk Assessments (Management Risk)  There is a risk that LFRS may fall in its duty to ensure an adequate and effective system of H&S risk assessment is in place, which may result in harm to staff and failure to meet statutory obligations. | A number of LFRS staff have successfully passed the IOSH risk assessment course provided by Leicestershire Police.  Despite this cadre of trained staff being available, fewer risk assessments have been developed than was originally intended.  Impact is high as lack of risk assessments and the actions that they drive can be a breach of duty, however, the likelihood of this happening will diminish under the new system when implemented.  | 2 | 5 | VH | ST | <ul> <li>Monitor roll out and adoption of the new form.</li> <li>Internal QA process by Health and Safety Team.</li> <li>TBRA Scrutiny through use of existing risk management committees.</li> <li>Risk assessments covered in IOSH and NEBOSH training.</li> </ul>  | January 2024 |
| 21/HS05 | Inability to maintain fire fighter competence for basement firefighting  | Concerns have been raised regarding the safety of basement firefighting. The Balmoral bar incident in Scotland is the highest profile of these incidents and involved the death of a fire fighter who was unable to reach safety. LFRS firefighters have received burns during basement fire training at the fire service college. Until we can train our firefighters to an appropriate standard of competency we are at risk of a firefighter becoming injured at a basement fire due to competency gaps.  | 2 | 5 | VH | ST | <ul> <li>Introduce an effective training course through outsourcing, expansion of the Hot Fire Training Unit at the Caterpillar site or await new training facility becoming available.</li> <li>Programme of hot fire basement training put into place for all operational firefighters using externally secured facilities.</li> </ul>  | January 2024 |

| RAT ID  | HAZARDOUS EVENT   | STRATEGY OUTCOME AT RISK | FII | NAL RISK SCO | PRE |    | REASON FOR REMOVAL  | DATE REMOVED |
|---------|---|--------------------------|-----|--------------|-----|----|---|--------------|
|         |   |                          | L   | С            | R   | ML |   |              |
| 23/P01  | Western Refurbishment Project There is an issue regarding the availability of supplier resources from the Estates Team. This may affect the ability to deliver the project within timescales.   | PROJECT RISK             | 3   | 4            | VH  | ST | Project Closed  | 16/02/2024   |
| 23/P02  | Market Bosworth Refurbishment Project There is a risk that there is not sufficient service project manager resource available.  | PROJECT RISK             | 4   | 3            | Н   | TC | Project resource suitable, project progressing on time  | 16/02/2024   |
| 23/P03  | Views Replacement Project There is a risk that issues with other systems or resource outside of the project could result in delays (e.g. FireWatch project progress, Systel warehouse, HR availability to support sickness data validation, replacement data warehouse)   | PROJECT RISK             | 2   | 4            | Н   | TC | Resource suitable   | 16/02/2024   |
| 23/P04  | Oracle Project T&D not using LMS to record all training/qualification activity as their primary system. There are multiple recording methods that were in use pre-LMS, which have not been phased out and take precedence over the LMS. This is leading to error within the data sets of the LMS and subsequently impacting upon the confidence of LMS reporting with the end user. | PROJECT RISK             | 4   | 4            | VH  | ST | Project closed  | 16/02/2024   |
| 22/HS01 | There is a risk that our staff could injure themselves whist carrying out fitness training within Service premises.   | HEALTH & SAFETY RISK     | 3   | 2            | М   | TC | Control measures in place. Health & Safety Committee approved removal from Register as now considered business as usual | 20/02/2024   |

| TACTICAL      | Those risks likely to require management oversight by the HSW Committee and sub-groups, Tactical Manager's Team (TMT) and/or individual Directors |
| OPERATIONAL   | Those risks likely to require management oversight by individual Group and Station Managers and/or TMT  |

## Glossary of Terms and Abbreviations

Hazardous Event - A potential event that can cause harm

Likelihood (L) - The chance of something happening. May be described by the probability, frequency or uncertainty of event

Consequence (C) - The outcome of an event. Specifically, the severity or extent of harm caused by an event

Operational (OP) - Those risks likely to require management oversight by individual Group and Station Managers and/or GMT

Tactical (TC) - Those risks likely to require management oversight by the HSW and CRM Committee and sub-groups, Group Manager's Team (GMT) and/or individual Director

Strategic (ST) - Those risks likely to require management oversight by SLT

Corporate (C) - Those risks likely to require management oversight by the CFA and/or SLT

Low (L) - Low level risk capable of being managed within normal service policy and procedure

Medium (M) - Low -mid level risk possibly requiring new policy and/or some financial outlay

High (H) - Mid-high level risk possibly requiring significant amendment to policy/procedure and significant financial outlay

Very High (VH) – High level risk with the potential to cause catastrophic damage to the reputation, finances or governance of the Service
